

AREV250 Series DC Contactor Specification 400Amp/900 VDC

Application

AREV250 is designed for High Current DC applications. The "AREV250" version adds the option for Normally Closed power contacts as well as the Latching version. It can meet the application requirements of DC current transmission and control for different types of photovoltaic/wind power generation systems, new Energy Vehicles and charging facilities.

Certification Information

Product complies with RoHS standard (2011/65/EU)

Nomenclature

AREV250

-

M

-

AN

"AREV250" = AREV250 Series

Type Code:

Blank = Main Contacts (NO)

"NC" = Main Contacts (NC)

"L" = Latching

Coil Voltage Code:

Standard Coils (w/Economizer):

"M" = 12 - 24 VDC

"E" = 48 VDC

"G" = 48 - 72 VDC

Latching Coils:

"B" = 12 VDC

"C" = 24 VDC

"E" = 48 VDC

Latching Coil Wiring Options:

Blank = Non-latching

"E" = 48 VDC

"2" = 2 Wire, Single Coil

"3 H" = 3 Wire, Dual Coil (High side drive)

"3 L" = 3 Wire, Dual Coil (Low side drive)

"4" = 4 Wire, Dual Coil

Options (applied in this order)

Blank = Std. Options (Bottom Mount, Without Aux. Contact :Polarized Load Terminals)

"S" = Side Mount

"A" = With Aux. Contact (SPST-NO)

"B" = With Aux. Contact (SPST-NC)

"C" = With Aux. Contact (SPDT)

"N" = Non-Polar Load Terminals

AREV250 Series DC Contactor Specification 400Amp/900 VDC

Performance Data:

| Main Contact | | Expected Life | |
|---|---|--|-------------------------------------|
| Contact Arrangement | 1 Form X (SPST-NO DM) | Load Life (Resistor Load) 250A/450VDC | 10,000 Cycles |
| Load Connection | M8 Thread Male | | |
| Rated Load Voltage | 12-900VDC | | |
| Max Breaking Limit | 2,000A @320VDC, 1 Cycle | Mechanical Life | >200,000 cycles |
| Dielectric Withstanding Voltage | Between Open Contacts: 4000Vms, 1 min., < 1mA Between Contacts to Coil: 2200Vms, 1 min., < 1mA | AUX Contact | |
| Insulation Resistance @ 500VDC | New: 100M Ω End of Life: 50M Ω | Aux Contact Arrangement | 1 From A |
| Voltage Drop (200A) | $\leq 60\text{mV}$ | Aux Contact Current Max | 2A @30VDC/ 3A @125VAC |
| Short Time Overload Current 70mm ² | | Aux Contact Current Min | 100mA@8V |
| 250A @85°C | Continuous | Aux. Contact Resistance Max. | 0.417ohms@30Vdc 0.150ohms@125Vac |
| 400A @40°C | 5 Minutes | | |
| 500A @40°C | 2 Minutes | | |
| 600A @40°C | 10 Seconds | | |
| Environmental Data | | Operate Time @ 25°C | |
| Shock 11ms 1/2 sine, peak Operating | 20G | Close (includes bounce) | 30ms, Max. |
| Vibration, sine, 80-2000 Hz. Peak | 20G | Bounce (after close only) | 5ms, Max. |
| Operating Ambient Temperature | -40 to +85°C | Release (include arcing) | 10ms, Max. |
| Altitude | <4000m | | |
| Weight, Nominal | 0.95 Lb. (0.43 kg) | | |

AREV250 Series DC Contactor Specification 400Amp/900 VDC

Coil Data (Cont.):

| Coil Data | | | |
|---|--------------------------------|--------------------------------|--------------------------------|
| Coil Code: | M | E | G |
| Rated Voltage* | 12-24 Vdc | 48 Vdc | 48-72 Vdc |
| Max Operate Voltage | 36Vdc | 72Vdc | 80Vdc |
| Pick-Up Voltage (20°C) Max. | 9Vdc | 36Vdc | 36Vdc |
| Pick-Up Voltage (20°C) Min. | 6Vdc | 18Vdc | 18Vdc |
| Coil Current (20°C @ Rated Voltage) | Inrush: 3.8A Holding: 0.13A | Inrush: 1.3A Holding: 0.03A | Inrush: 1.3A Holding: 0.03A |
| Coil Power (20°C @ Rated Voltage) | 2W | 2W | 2W |
| Max Pick-Up Voltage (85°C) | 9.6Vdc | 38.4Vdc | 38.4Vdc |
| Coil Resistance + 5% (20°C) | 3.1 Ω | 40 Ω | 40 Ω |
| Latching Single Coil (2 Wire) | | | |
| Coil Code: | B2 | C2 | E2 |
| Rated Voltage: | 12 Vdc | 24 Vdc | 48 Vdc |
| Max Operate Voltage | 16 Vdc | 28 Vdc | 52 Vdc |
| Must Set and Reset Voltage (20°C) Max. | 9 Vdc | 18 Vdc | 36 Vdc |
| Coil Current (20°C@Rated Voltage) | 4.0 A | 2.4 A | 1.2 A |
| Max Pick-Up Voltage (85°C) | 11.1 Vdc | 19.2 Vdc | 38.4 Vdc |
| Coil Resistance ± 5% (20°C) | 3Ω | 10Ω | 40Ω |

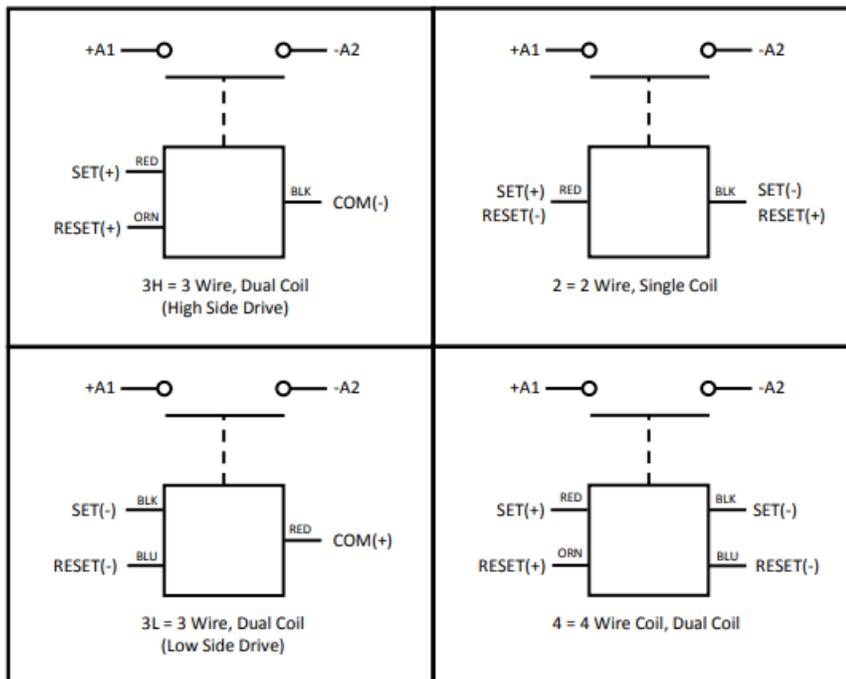

AREV250 Series DC Contactor Specification 400Amp/900 VDC

| Latching Dual Coil (3 & 4 Wire) | | | | |
|---------------------------------|-------------------------|--------------|--------------|----------------|
| Coil Code: | | B3H, B3L, B4 | C3H, C3L, C4 | 4 E3H, E3L, E4 |
| Rated Voltage: | | 12 Vdc | 24 Vdc | 48 Vdc |
| Set Coil (20°C) | Max. Voltage | 16 Vdc | 28 Vdc | 52 Vdc |
| | Must Set Voltage (Max.) | 9 Vdc | 18 Vdc | 36 Vdc |
| | Rated Current | 6 A | 2.7 A | 1.7 A |
| | Coil Resistance ± 5% | 2 Ω | 8.8 Ω | 28 Ω |
| Reset Coil (20°C) | Max. Voltage | 16 Vdc | 28 Vdc | 52 Vdc |
| | Must Set Voltage (Max.) | 9 Vdc | 18 Vdc | 36 Vdc |
| | Rated Current | 4 A | 2.5 A | 1.2 A |
| | Coil Resistance ± 5% | 3 Ω | 9.6 Ω | 40 Ω |

Note: Minimum 100 ms Set and Reset pulse required.

Latching Contactor:

AREV250 Series DC Contactor Specification 400Amp/900 VDC

APPLICATION NOTES:

1. To prevent loosening, washers should be used whenever the contactor is installed. All terminals or copper bar must be in direct contact with the contactor's main terminals. Please control the screw tightening torque of each part within the specified range in the table below. If the torque exceeds the recommended range, it may cause damage to the sealed cavity and thread damage.
 - Contact torque: 70-90 lb. in. (8-10 N.m)
 - Mounting torque: 15-30 lb. in. (1.7-3.3 N.m)
2. Products with polarity marked on the load end must be used correctly according to the product label. When the load connection polarity is reversed, the electrical characteristics promised in this manual cannot be guaranteed.
3. Products with a coil economizer are already equipped with back EMF circuits, so there is no need to use surge protectors.
4. Avoid installing the contactor in a strong magnetic field environment (near transformers or magnets) and avoid placing the contactor near objects with heat radiation.
5. When continuous current is applied to the contacts of the relay, and the Coil is turned on immediately after the power is cut off. At this time, as the temperature of the coil increases, the resistance of the coil will also increase, which will increase the pull-in voltage of the product, which may result in exceeding the rated Pull-in voltage. In this case, the following measures should be taken to reduce the load current; limit the continuous power-on time or use a coil voltage higher than the rated pull-in voltage.
6. When the voltage applied to the coil exceeds the maximum allowable applied voltage, the coil temperature may rise and lead to coil damage and inter-layer short circuit.
7. The rated values in the contact parameters are values for resistive load. When using an inductive load with $L/R > 1\text{ms}$, please connect a surge current protection device to the inductive load in parallel. If no measures are taken, the electrical life may be reduced and the continuity may be poor. Please consider sufficient margin space in the design.
8. Supply power must be greater than coil power or it will reduce performance capability.
9. Please do not allow debris and oil to adhere to the main terminals; Make sure that the main terminals are in reliable contact with the load conductor, otherwise the temperature rise of the terminal / conductor connection may be too high due to the excessive contact resistance.

AREV250 Series DC Contactor Specification 400Amp/900 VDC

10. The load conductor must have the corresponding current load capacity and heat dissipation capacity (it is recommended to use a copper bar with a min 50mm²), to prevent overheating and affecting the life of the contactor.
11. Is impossible to determine all the performance parameters of contactors in each specific application, therefore, customers should choose the products matching them according to their own conditions of use. If in doubt, contact Altran, however, the customer will be responsible for validating that the products meet their application.
12. Do not use if dropped.
13. Altran reserves the right to make changes as needed. Customers should reconfirm the contents of the specification or ask for us to supply a new specification if necessary.
